## SKILLS

---

**Languages:** HTML, CSS, JavaScript, Java, Python, C, SQL, Git, Linux

**Frameworks:** React, React-Native, Redux, Express.js, Node.js, Spring Boot, Bootstrap, Tailwind, REST

**Tools:** VS Code, JIRA, MySQL, MongoDB, GitHub, Docker, AWS, Shopify

## EMPLOYMENT

---

### Front-End Software Developer | HungerSwipe(Crossed)

Feb 2022 – Jan 2023

- Assessed **UX/UI** designs from Figma and implemented web pages and mobile application layouts using **JavaScript(React-Native & React), HTML and CSS**
- Developed and maintained cross platform **React-Native App** components, screens, and features for the **iOS & Android** operating base increasing overall development pace
- Collaborated with other developers to implement new features in a way that is consistent with existing codebase conventions using **agile methodology**
- Tested script for bugs and operating speed, fixing bugs and documented process to **increase development process efficiency**

### Full Stack Software Developer | Blast Engine (Intern)

Jan 2019 – Aug 2019

- Worked with a team of developers to improve real-time quality of experience on desktop views including latency of **load-time and website responsiveness** coordinate client requirements
- Developed new user-facing features, **translating designs** and wireframes into code
- Built and architected multipage web app to single page increasing page speed by **30%**
- Relevant technologies: **Node, ReactJS, React Native, Redux and Google Firebase**

## PROJECTS

---

### KeepList | HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, Rest, EJS, GitHub

- Full stack** Task tracker web application that keeps track of events to perform addition, deletion retrieval and update of data.
- App data connected to a Data base that enables data rendering, adding, updating on Database with the help of **MongoDB via Heroku**

### DoctoShotgun | Python, OOP, System Design, CI/CD, SDLC(Agile), GitHub

- Applied **design patterns** to contribute on the open source project Doctoshotgun (script in **python** allowing users to book a vaccine slot in France and Germany)
- Analyzed **python script** and applied multiple types of **design patterns** to the script for it to be more readable, efficient and maintainable

### ChatFast | React.js, Tailwind, Node.js, Firebase

- Online **chat application** based on **React.js** uses **google authentication** for verification with Back-End supported by **Firebase**

## EDUCATION & ACHIEVEMENTS

---

### York University

Jan 2022

Lassonde School Of Engineering, B.Sc. Computer Science

### Learning Excellence Award

Oct 2021

**Relevant work** | Design & Analysis of Algorithm, Software Design, OS, Design Patterns
