## WORK EXPERIENCE

### IT Support Specialist

**NHL ESPN (Sutherland)**

November 2020 – April 2021 Windsor, ON

- Diagnosed program malfunctions, identifying root causes and implementing corrective solutions for end users of streaming services of NHL
- Documented and maintained detailed records of support requests, escalations, and actions taken.
- Guided users through detailed hardware installations and technical fixes via phone call, email, and live chat.
- Reduced support calls by contributing self-help information, operating tips, FAQs, and technical solutions to common problems.
- Communicated clearly asking informed questions and listening actively to provide targeted support for technical issues.

### IT Support/Delivery Driver

**LKQ (MAX Auto)**

September 2017 - September 2019 Toronto, ON

- Installed and performed minor repairs to hardware, software, or peripheral equipment, following design or installation specifications.
- Oriented staff to new equipment and systems, providing live demonstrations and answering questions.
- Reviewed orders before delivery and confirmed completeness and proper invoicing to optimize customer service.
- Researched and traveled most direct route and delivered items on schedule or ahead in safe and secure way.

## PROJECTS

SetupsCraze |**HTML, CSS, JavaScript, Shopify, Ecommerce**

- Created, designed and implemented Ecommerce website SetupsCraze(Online ecommerce store for computer accessories & gadgets) with special features to achieve functionality outlined in project designs.
- Contributed to code reviews, debugging, and optimization for website using front and back end technologies in full stack web development.

DoctoShotgun |**Python, Design patterns, OOP, System Design**

- Applied design patterns to contribute on the open source project Doctoshotgun (python script for booking a vaccine slot in France and Germany)
- Applied multiple design patterns like Structural and Composite design pattern to the open source for it to be readable, efficient
